- HDMI output with 1080i up-conversion
- Satellite/cable input, two auxiliary inputs
- Dolby® Virtual Speaker technology
- Wireless subwoofer offers deep bass and placement ease
- Wirelessly broadcasts audio to other KlipschCast™ products

SPECIFICATIONS

Big Sound, Compact Package

As the leader in professional cinema speakers, we're bringing big movie sound to our CS-700 home theater system, sized to fit beautifully in any room. This award-winner creates enveloping surround sound performances using Dolby® Virtual Speaker technology and just two satellites, a wireless subwoofer and an A/V center.

The CS-700 also features KlipschCast™ wireless technology so, by pairing it with one or more of our RoomGroove iPod® speakers (sold separately), you can set your music and movies free.

Audio Everywhere—Wirelessly!

Thanks to KlipschCast, the CS-700 not only transmits CD-quality audio to its local subwoofer, but also to one or more of our RoomGroove iPod speakers, which also incorporates this uniquely superior wireless capability.

By themselves, the CS-700 and RoomGroove are top-flight performers; together, they deliver the full potential of a KlipschCast system—wirelessly sending superior music, TV or movie sound throughout your home. There's no wires, no holes to drill and no difficult set up.

No Muss, No Fuss

The CS-700 can be operating in as little as 10 minutes. All it takes is hooking the satellites and TV up to the A/V center using the color-coded wiring, then plugging in the A/V center's power cord. With respect to the subwoofer, all you have to do is plug its power cord into the wall; no other connections are needed.

frequency response	30 Hz to 20 kHz ± 3dB
amplifier power	Subwoofer: 200W continuous ≤10% THD+N Speakers: FTC rated 75 W/channel continuous, 2 channels driven, ≤1% THD+N.
crossover frequency	125 Hz, 24 dB/Octave
maximum acoustic output	112 dB
