Features	50" cable; Soft dark gray oval silicon ear tips
Finishes	Black soft-feel paint with off-white accents
Built From	2007

Custom 1 earphones utilize dark gray patent-pending Contour Ear Gels that are anatomically designed to accurately fit inside the human ear canal. These soft, oval silicon tips reduce ear fatigue as well as provide an amazing seal for excellent noise isolation and bass response.

Because ear canal measurements vary, Custom 1 comes with five different washable ear gel sizes: small, medium, and large single flange designs, as well as small and large double flange designs.

For perfect exterior comfort, flexible ear wires bend over and around the ears so they can be customized to each user.

Wherever you go, Custom 1 lets stunningly precise audio go with you. Exclusive KG332 balanced armatures generate deeper bass, a more robust midrange, and clearer high notes for that true-to-life listening experience only Klipsch can deliver.

Klipsch has gone to great lengths to ensure the long-lasting durability of Custom 1, including its 50-inch-long cables. Put through extensive "real world" testing, these headphones feature strain relief at every cable connection point to help prevent wire damage. A special PVC Wireguard jacket prevents the wires from becoming exposed and frayed.

Great iPod® headphones, Custom 1 is also compatible with the iPhone™ and virtually any device with a headphone jack. These headphones come with a high-quality vinyl carrying case that will also fit an 80G iPod, an airplane adaptor, five sets of different-sized ear gels, and an ear gel cleaning tool.
