

# High Definition 5.1 Speaker System

# HD THEATER 1000

- Premium 5.1 speaker system, perfect for larger rooms
- Five identical speakers for left, right, center and surround use
- Subwoofer generates deep bass you can hear and feel
- Clean, modern design looks great in any room and around any flat panel TV
- MicroTractrix Horns allow for vertical or horizontal speaker placement
- Speakers include 1/4-20 inserts for stand or wall bracket mounting

This high-definition system is simple to set up and use. It consists of left and right main channel speakers for superior stereo sound, a center channel speaker for precise dialogue, left and right rear speakers for lifelike surround sound and a subwoofer for heart-thumping bass.

All five speakers in the HD Theater 1000 are identical, creating a seamless blend of sound and style. Inside each modern, high-gloss black enclosure, you will find durable, high-quality components that will provide superior performances for years to come. Each speaker is magnetically shielded—so it won't interfere with your TV picture—and can be positioned vertically or horizontally next to your HDTV or other type of flat-panel.

But what makes these speakers truly unique is their horn-loaded technology, an exclusive design that has made Klipsch an industry leader for over 60 years. It's an engineering philosophy that allows the HD Theater 1000 to deliver genuine lifelike sound and produce more output, using less energy. In fact, over half of all new theaters in North America and several other countries choose Klipsch professional products because of the amazing benefits of horn technology, such as low distortion and high efficiency.

The system's subwoofer delivers class-leading, room-shaking bass thanks to a powerful digital hybrid subwoofer amplifier and a 10-inch driver. Featuring a sleek black pica vinyl finish, this hard-hitter also includes traditional volume, crossover and phase controls so you can customize the level of bass for your room.

## SPECIFICATIONS

### System Specifications

Maximum Acoustic Output	114 dB
Frequency Response	35Hz - 20kHz

### Satellite / Center
