

In-Ear Headset with Mic & 3-Button Remote

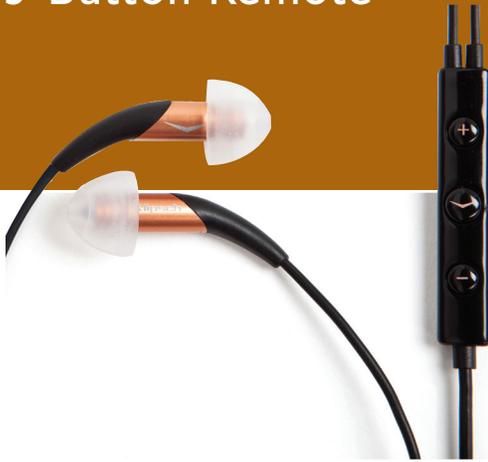

IMAGE X10i

Among the world's smallest, lightest in-ear headphones, the Image X10i employs a wealth of micro technology for comfortable wear and audiophile-quality listening. Plus, it includes an advanced mic and 3-button remote for taking calls and controlling the music content on your iPod, iPod touch or iPhone 3GS.

Superior Design

The X10i positions its in-line microphone and remote at the yoke to create a more natural feel when answering calls and controlling music. Because the microphone is a highly intelligible 360° design, you don't have to talk down into it or hold it close to your mouth. The microphone also features echo cancellation, which keeps it from picking up surrounding noise.

Luxurious Comfort

Unlike traditional, circular-shaped ear tips that put stress on the pressure points inside your ear, the X10i utilizes patented oval ear tips that naturally fit the shape of your ear canals, making them extremely comfortable and virtually impossible to feel. Additionally, these exclusive ear tips produce a perfect acoustic seal, which minimizes outside noise so you can enjoy your music at lower, safer volumes.

Magnificent Sound

Inside each ear piece, which is made of machined aluminum and finished in anodized copper, you'll find an exclusive full-range armature micro-speaker with a tuned bass-reflex system that delivers lifelike dynamics, sonic clarity and booming bass.

Compatibility*

While the Image X10i serves as a pair of premium headphones for any device with a 3.5 mm headphone jack, its mic and remote system handles the music and/or voice control of the following Apple products: iPhone 3GS, third generation iPod shuffle, second generation iPod touch, fourth and fifth generation iPod nano models and the iPod classic 120GB. With an iPod touch or iPhone and Wi-Fi access, you can also use the Image X10i with VOIP (need an adapter for PC or Mac), Skype and iChat.

- Designed for the iPhone 3GS, iPod touch and iPod*
- Full music and/or voice control on select products
- Award-winning sound performance
- Patented oval ear tips for unbeatable comfort
- 360° mic enables highly intelligible phone calls
- Superior noise isolation
- Amazing bass response
- Durable cables with built-in strain relief
