

Hope, Arkansas
October 16, 1945

Dear Major:

We all hope that you are having a wonderful trip and that it will be very successful. I suppose by now that the convention is in full swing and you are thoroughly enjoying it.

For a brief resume of your mail the past couple of days:

J. W. Bremer of G.E. writes that your reprints have been received and will be considered. Darn nice of him, isn't it?

Pa. Coal Products Co. of Petrolia, Pa. have sent you free 1 pound of Penacolite.

R. D. Rettenmeyer, I.R.E. re "A Strain Gage Phonograph Pickup" - submitted your manuscript the 10th to the Papers Committee for review. Their decision will probably be available in about two months.

I am enclosing A. N. Curtiss' letter which I thought you might want. It was sent air mail- special delivery.

Mrs. Klipsch told us about your invitation to speak before the St. Louis I.R.E. the 24th and I think that is swell.

If you happen to be where Bob Chester's orchestra is playing I will certainly appreciate you speaking to my brother. His name is Tommy Kinser, plays the sax and is a blonde. He called us Sunday night from Rochester, N. Y. and said he had gotten married the night before (which was quite a surprise to us), and that army planes were flying them to Norfolk, Va. the next day for a big show and dance that night, but would return to N. Y. the next day.

Everything is running along very smoothly here, however, Mary and I have ~~so~~ almost all to ourselves today as Billy, Tooley and Mack are sick today. I feel sure they will be back tomorrow as neither of them are very ill. So far today is very quiet and we are making it fine.

Let us hear from you again if you have time as I know you are going about ninety miles an hour ~~sixteen~~ hours a day.

Best regards from the Tech. Br.,

Margaret
