I wouldn't have that damn stuff up my nose if I had room for a sawmill!	referring to a stock	1973 Recording
My first great love was railroads, but then in 1911 I saw Lincoln Beechy flying in and out of Purdue stadium and I fell in love with airplanes. I didn't forsake my first love, I just became polygamous.		1973 Recording
Radio and the related arts I can say dates back to before I was 8 years old.		1973 Recording
At the "lowth" of the depression (that's the opposite of the "height").....		1973 Recording
After the war I was a major then, and a young 2nd lieutenant was interviewing for what kind of a job I wanted after the war, and I said I don't want a job, I'm going to manufacture loudspeakers. And I remember at the bottom of the questionnaire, it read: "Individual has no previous experience".		1973 Recording
Little shanty	referring to the tin shed	1973 Recording
After I paid the men I had \$2.00 in my pocket.	referring to factory employees	1973 Recording
I didn't draw a salary, I drew some expense money.		1973 Recording
Would you buy a used car from this man?	referring to Bob Moers, the general manager of Klipsch	1973 Recording
He was a panty-waste.	referring to a sales rep	1973 Recording
He was sales "mangler".		1973 Recording
He's built the damn company up into something that's pretty darn dynamic.	referring to Bob Moers	1973 Recording
I was about through with sales managers.		1973 Recording
We wring 'em out pretty darn hard.	referring to acoustic tests	1973 Recording
Research was a hard nut to crack.		1973 Recording
The secret of the product quality wasn't the fact that it was a cornerhorn speaker, but that it was, well, a high quality product all the way through.		1973 Recording
Now here's the principle of putting a speaker in a corner.....		1973 Recording
Any speaker works better in a corner.		1973 Recording
I'm an 1/8th German and a 1/5th Scotch.		1973 Recording
I went to Stanford to do my loafing as profitably as possible.		1973 Recording
I even had an illegal transmitter.	referring to high school radio tinkering	1973 Recording
The hobby was still with me.		1973 Recording
You're supposed to suck the head, aren't you?	In a discussion about eating crawfish	Harmon Interview

They were so big, 3 of them made a dozen.	In a discussion about eating oysters	Harmon Interview
...2% inspiration and 98% perspiration. I've done some of that perspiration myself.		TV Interview 1984
Listeners appreciate a lack of distortion.		TV Interview 1986
As long as man brags of conquest, man will claim his "great discoveries". To try to judge the real from the false will always be hard. In this fast growing art of "high fidelity" the quackery will bear a solid gilt edge that will fool many people.	530528	Written
I shouldn't need to explain that cash flow is a little like blood flow. Either one has flow or has big trouble.	680906	Written
Preachers and army Officers probably ought not to think Klipschorns – the next assignment may involve quarters without corners.	681223	Written
Audio was a hobby and then a profession, but I still consider myself as an amateur in that an amateur is one who practices his art for love.		
My theories on audio and audio reproduction will be proven wrong only when the laws of physics change.		
...they say flattery is like making love to a widow -- you can't overdo it.	611018	Written
For my part, I'm still using ears as measuring tools. The ear says it is right or wrong; the X-Y recorder may aid in showing why.	630212	Written
Well I found out 4 more things that don't work!	610301 -referring to drag-reduction experiments	Bonanza Cockpit Book
