

## ProMedia 2.1 Wireless

Set your sound free! ProMedia 2.1 Wireless computer speakers let you listen to music, movie soundtracks and games in amazing 2.1 audio without being tied to your desk.

Based on the original ProMedia 2.1—the first three-piece computer system to ever be THX® certified—the new wireless version lets you move your laptop or notebook freely up to 30 feet, while still enjoying your favorite audio content.

The system's two-way speakers with legendary Klipsch MicroTractrix Horns are still the gold standard for computer speakers, while the 200-watt subwoofer provides the added punch that makes your audio content come to life.

The ProMedia 2.1 Wireless is a true “plug-and-play” system; just connect the USB wireless transmitter into your computer and in moments you'll enjoy your iTunes, Internet radio and more like never before. Plus, its robust 2.4 GHz wireless technology won't interfere with other wireless devices, such as cordless phones, so nothing stands in the way of you and amazing sound.

Easy to set up and operate, the ProMedia 2.1 Wireless makes every song, every movie and every game more powerful—and frees you to be where you want to be...not tied to one spot!

Tip: iPhone and iPod Touch owners with a Wi-Fi connection can use Apple's Remote Application to wirelessly control the iTunes on their computers.

- USB wireless transmitter streams audio up to 30 feet away
- Robust 2.4 GHz wireless technology provides interference-free performance
- Same award-winning sound as the original ProMedia 2.1
- Easy plug-and-play design, no router or installation software required
