

6.5" Two-Way In-Ceiling Loudspeaker

R-2650-C

By upholding the same best-in-class standards as all Klipsch products, the R-2650-C in-ceiling loudspeaker makes it possible to bring high-performance audio into the home without taking up valuable floor space.

This no-compromise, yet affordable, speaker employs a 6.5-inch gray polymer woofer cone and a 1-inch soft/silk dome tweeter to deliver mind-bending depth and clarity. By incorporating a proprietary two-screw mounting solution, the R-2650-C is also one of the most easy-to-install products on the market.

Available in a white finish, this speaker can be paired with one of Klipsch's new installation kits (sold separately). Each of these revolutionary kit designs allow for increased mounting flexibility and incorporate a mud ring, wire tie and universal metal mesh wing for multi-position placement and a color-coded bracket for easy speaker size identification.

- Good sensitivity and power handling
- Weatherized components
- Rugged ABS frame
- Time saving two-screw mounting method
- Paintable to match ceiling
