

## Quad 5.25" Two-Way Floorstanding Loudspeaker

# RVX-54

As plasma and LCD television sales continue to soar, Klipsch is introducing a true, high-performance audio solution that will accommodate this growing segment. With similar flatness and style, the Klipsch Reference Series RVX-54 floorstander represents the ultimate in performance, style and functionality for these hot-selling televisions.

The RVX-54 has a single-piece aluminum extrusion enclosure. It employs four active 5.25-inch aluminum woofers and uses a 1-inch titanium-dome compression drivers mated to a round Tractrix® Horn for maximum clarity and efficiency.

Available in the same black or silver finish as the Klipsch Reference Satellites, the RVX-54 can be combined with these compact speakers to create complete systems. For example, consumers can create a 5.1-channel surround sound system using a pair of RVX-54s, a pair of Reference Satellite RSX-4s for surrounds, a RVX-42 for a center channel and a Reference Series RW-12 subwoofer.

The RVX-54 is packaged and sold individually for mix-and-match simplicity.

- Very high sensitivity
- MicroTractrix Horn tweeter for clean, detailed highs
- Integrates well with all Klipsch powered subwoofers
- Magnetically shielded drivers to prevent video interference
- Bi-Wire compatible inputs

### SPECIFICATIONS
