

SYNERGY S-1

- Exclusive WDST technology provides the ultimate “you-are-there” experience
- Provides ambient and localized sound with unlimited placement flexibility
- Dual horn-loaded tweeters and single 4-inch woofer deliver remarkable detail
- High-quality cabinet features a sleek black finish with titanium accents

The Synergy Series S-1 surround speaker is the smallest of its kind to utilize Klipsch's exclusive Wide Dispersion Surround Technology (WDST), which ensures a dynamic, enveloping surround experience and precise localization throughout a room.

The S-1 delivers precise sonic detail through the careful positioning of two Tractrix® Horn-loaded aluminum-dome tweeters and one 4-inch IMG woofer. By aligning the two horns at 90 degrees with respect to each other, along with the front-firing woofer, the S-1 smoothly covers a 180-degree horizontal arc. As a result, the surround points at you no matter where you are seated. This configuration also provides the greatest variety of placement options, enabling the speaker to work well in virtually any room configuration.

Available in a black finish with titanium accents, the contemporary look of the S-1 is two-fold. With its grille on, the S-1 offers a sense of elegance that nicely blends in with your home décor, but take the grille off and you get an aggressive and powerful statement that exudes extreme performance.

This impressive surround delivers the performance of speakers twice its price by creating enveloping sound that places you in the middle of the action, as well as correctly localizing specific sounds so that what you hear matches what you see on the screen.
